Details of the installation		
Client PLJ Properties	Installation (If different from client)	N/A
Address 16 Castleton Grove Jesmond Newcastle upon Tyne	Address 16 Grosvenor Gardens Jesmond Newcastle upon Tyne	
Postcode NE2 2HD	PostcodeN/A	
Reason for producing this report This form to be used only for reporting Landlord request, previous periodic inspection report has expired.	ng on the condition of an existing ins	tallation.
Landiora request, previous periodic inspection report has expired.		
Date(s) on which the inspection and testing were carried out 28/1	/2013 to 28/ 1 /2013	
Details of the installation which is the subject of this report		
Description of premises Domestic Commercial Indu Estimated age of the wiring system 10 years	strial Other (please state)	Rented accomodation
Evidence of alterations or addition Yes No Not apparent	If 'Yes', estimated	years
Records of installation available Yes No Records held by Clien		
	icate No. or previous Inspection Re	port No. DPN3/1599765
Extent and limitations of inspection and testing Extent of electrical installation covered by this report:		
Complete test and inspection at cunsomer unit, R1&R2 only carried out in ring final circling inspected.	uits. Approx 20% of fixtures and fitt	
Agreed limitations (See Regulations 634.2) Agreed with: Client		
Operational limitations including the reasons (see page no of)	N/A	
The inspection and testing detailed within this report and accompanying (IET Wiring Regulations), amended to 2011 (date) It should be noted that cables concealed within the trunkings and conductions.	its, under floors, in roof spaces and	generally within the fabric of the
building or underground have not been inspected unless specifically ag	reed between the client and inspec	tor prior to the inspection.
Summary of the condition of the installation General conditions of the Installation (in terms of safety)		
Satisfactory		
Overall assessment of the installation in terms of its suitability for continu * An UNSATISFACTORY assessment indicates that dangerous (code C1) and/or potent		UNSATISFACTORY* been identified
Recommendations		
Where the overall assessment of the suitability of the installation for cont that any observations classified as 'Danger present' (code C1) or 'Potent Investigation without delay is recommended for observations identified a 'Improvement recommended' (Code C3) should be given due considera recommend that the installation is further inspected and tested by	ially dangerous' (code C2) are acte as 'further investigation required'. Ol	d upon as a matter of urgency. oservations classified as
Declaration I/We, being the person(s) responsible for the inspection and testing of the particulars of which are described above, having exercised reasonable sideclare that the information in this report, including the observations and condition of the electrical installation taking into account the stated exterior.	skill and care when carrying out the d the attached schedules, provides	inspection and testing, hereby an accurate assessment of the

NAPIT *Electrical Installation* Condition Report

Guidance for recipients

This report is an important and valuable document which should be retained for future reference.

- The purpose of this condition report is to confirm, so far as reasonably practicable, whether or not the electrical installation is in a satisfactory condition for continued service (see Section E). The report should identify any damage, deterioration, defects and/or conditions which may give rise to danger (see Section K).
- 2. The person ordering the Report should have received the original Report and the inspector should have retained a duplicate.
- 3. The original Report should be retained in a safe place and be made available to any person inspecting or undertaking work on the electrical installation in the future. If the property is vacated, this Report will provide the new owner /occupier with details of the condition of the electrical installation at the time the Report was issued.
- 4. Where the installation incorporates residual current devices (RCDs) there should be a notice at or near the devices stating that they should be tested quarterly. For safety reasons it is important that these instructions are followed.
- 5. Section D (Extent and Limitations) should identify fully the extent of the installation covered by this Report and any limitations on the inspection and testing. The inspector should have agreed these aspects with the person ordering the Report and with other interested parties (licensing authority, insurance company, mortgage provider and the like) before the inspection was carried out.

- Some operational limitations such as such as inability to gain access to parts of the installation or an item of equipment may have been encountered during the inspection. The inspector should have noted these in Section D.
- For items classified in Section K as C1 ("Danger Present"), the safety of those using the installation is at risk, and it is recommended that a competent person undertakes the necessary remedial work immediately.
- 8. For items classified in Section K as C2 ("Potentially Dangerous"), the safety of those using the installation may be at risk and it is recommended that a competent person undertakes the necessary remedial work as a matter of urgency.
- 9. Where it has been stated in Section K that an observation requires further investigation the inspection has revealed an apparent deficiency which could not, due to the extent or limitations of this inspection, be fully identified. Such observations should be investigated as soon as possible. A further examination of the installation will be necessary, to determine the nature and extent of the apparent deficiency (see Section F).
- 10. For safety reasons, the electrical installation should be re-inspected at appropriate intervals by a competent person. The recommended date by which the next inspection is due is stated in Section F of the Report under 'Recommendations' and on a label at or near to the consumer unit / distribution board.
